Twilight over the Capital Markets

Gerhard Winzer

© © Ulrike Gruber

Are we now on the other side of the recent price decline in the risky asset classes? Global [equities](#), bonds with default risk, and emerging markets have been recording significant gains. Has the fundamental situation improved, or had the assets excessively negative events priced in?

The driving factors for the global economy and the financial markets are the weakness of the emerging markets, the possible spill-over effects for the developed economies, and the expectations of a raise of the Fed funds rate in the USA.

Stimuli in China

The Chinese currency is currently slightly stronger vis-à-vis the US dollar than after the depreciation in August. This has led to a decrease in worries over a depreciation spiral. Also, the foreign exchange reserves in [China](#) have declined less significantly than anticipated, and the Chinese equity prices have been rising for numerous weeks. The risk that would emanate from hefty capital outflows is therefore less pronounced. The economic data are mixed. Chinese economic growth has stabilised in Q3. The weakening of the growth rates of industrial production and investments is offset by considerable growth in the tertiary sector. Hopes are for the fiscal and monetary stimuli to suffice in order to facilitate a soft landing for the economy. That being said, the leading indicator published by the National Bureau of Statistics of China was falling until August. At the very least, money supply growth accelerated in September.

Improved financial environment

The so-called financial conditions have improved worldwide, while volatilities and spreads for default and liquidity risk have decreased. Of course, in parts this is a tautology (prices are up because prices are up). Still, the sell-off of assets has stopped, which calms the global financial markets. The risk for the global economy, which stems from the turbulences on the financial markets, has declined.

With a forked tongue

The expectations of future hikes of the Fed funds rate in the USA have fallen further. In the environment of economic weakness in the [emerging markets](#), this acts as relaxant. However, the signals from the FOMC of the US Fed are mixed. Whereas some members have declared themselves in favour of a rate hike before the end of the year, others favour the zero interest rate policy that has been in place. In other words, the forward guidance, i.e. the preparation of the market for the future monetary policy, is not working anymore. This may potentially come with destabilising effects.

Falling economic indicators

Important economic indicators such as the purchasing managers index provided by Markit and the leading indicators of OECD are locked into a falling trend. In line with this situation, many organisations – most recently the IMF – have revised their estimates for global economic growth downwards.

The weak growth rate of industrial production comes with global repercussions. While the falling goods prices cause the purchase power of consumers to increase, the sales and profits of companies have come under pressure. The crucial question is whether in the coming quarters the pressure for lower corporate expenses (lower capex, lower employment figures) will increase.

Summary

Capital markets are in a “twilight zone”. In this zone it is not clear, if the sun goes up or the night lies ahead. The abatement of the panic on the financial markets is indeed supported by an improvement of the determining factors (China, spill-over, Fed). This means that at hindsight a relief rally could easily be justified. However, the fundamental situation has not changed. This suggests that investors should remain cautious vis-à-vis risky asset classes.

This document is an advertisement. Unless indicated otherwise, source: Erste Asset Management GmbH. The language of communication of the sales offices is German and the languages of communication of the Management Company also include English.

The prospectus for UCITS funds (including any amendments) is prepared and published in accordance with the provisions of the InvFG 2011 as amended. Information for Investors pursuant to § 21 AIFMG is prepared for the alternative investment funds (AIF) administered by Erste Asset Management GmbH pursuant to the provisions of the AIFMG in conjunction with the InvFG 2011.

The currently valid versions of the prospectus, the Information for Investors pursuant to § 21 AIFMG, and the key information document can be found on the website www.erste-am.com under "Mandatory publications" and can be obtained free of charge by interested investors at the offices of the Management Company and at the offices of the depositary bank. The exact date of the most recent publication of the prospectus, the languages in which the key information document is available, and any other locations where the documents can be obtained are indicated on the website www.erste-am.com. A summary of the investor rights is available in German and English on the website www.erste-am.com/investor-rights and can also be obtained from the Management Company.

The Management Company can decide to suspend the provisions it has taken for the sale of unit certificates in other countries in accordance with the regulatory requirements.

Note: You are about to purchase a product that may be difficult to understand. We recommend that you read the indicated fund documents before making an investment decision. In addition to the locations listed above, you can obtain these documents free of charge at the offices of the referring Sparkassen bank and the offices of Erste Bank der oesterreichischen Sparkassen AG. You can also access these documents electronically at www.erste-am.com.

N.B.: The performance scenarios listed in the key information document are based on a calculation method that is specified in an EU regulation. The future market development cannot be accurately predicted. The depicted performance scenarios merely present potential earnings, but are based on the earnings in the recent past. The actual earnings may be lower than indicated. Our analyses and conclusions are general in nature and do not take into account the individual characteristics of our investors in terms of earnings, taxation, experience and knowledge, investment objective, financial position, capacity for loss, and risk tolerance.

Please note: Past performance is not a reliable indicator of the future performance of a fund. Investments in securities entail risks in addition to the opportunities presented here. The value of units and their earnings can rise and fall. Changes in exchange rates can also have a positive or negative effect on the value of an investment. For this reason, you may receive less than your originally invested amount when you redeem your units. Persons who are interested in purchasing units in investment funds are advised to read the current fund prospectus(es) and the Information for Investors pursuant to § 21 AIFMG, especially the risk notices they contain, before making an investment decision. If the fund currency is different than the investor's home currency, changes in the relevant exchange rate can positively or negatively influence the value of the investment and the amount of the costs associated with the fund in the home currency.

We are not permitted to directly or indirectly offer, sell, transfer, or deliver this financial product to natural or legal persons whose place of residence or domicile is located in a country where this is legally prohibited. In this case, we may not provide any product information, either.

Please consult the corresponding information in the fund prospectus and the Information for Investors pursuant to § 21 AIFMG for restrictions on the sale of the fund to American or Russian citizens.

It is expressly noted that this communication does not provide any investment recommendations, but only expresses our current market assessment. Thus, this communication is not a substitute for investment advice, does not take into account the legal regulations aimed at promoting the independence of financial analyses, and is not subject to a prohibition on trading following the distribution of financial analyses.

This document does not represent a sales activity of the Management Company and therefore may not be construed as an offer for the purchase or sale of financial or investment instruments.

Erste Asset Management GmbH is affiliated with the referring Sparkassen banks and Erste Bank.
